GD XPRO EXTREME PERFORMANCE LAMINATED MOUTHGUARDS

Your school or club recommends **GD XPRO** laminated mouthguards to be worn in sport practice or competition and have approved for you to receive this information.

Mouthguards are worn in just about every sport these days, and many codes are making it compulsory to do so. We also observe that the users are starting to do so at a much younger age. This not only reduces injury but establishes good habits for later years.

The fact is that the majority of mouthguards worn in Australia today are the boil and bite type, which are freely sold over the counter at chemists and sport stores. It is also a fact that all dental professionals agree that the only safe mouthguard is one which is custom made for the individual and not one which is bought over the counter.

Professional custom made mouthguards are very comfortable to wear but more importantly they greatly reduce the risk of injuries such as broken and chipped teeth, cut lips and tongues, broken jaws, neck injuries and concussion.

Galadent Dental has been in the business of fabricating custom made mouthguards for over thirty years.

We provide a unique dental service, whereby experienced dental professionals will visit your club or school on a pre-determined day to take the dental impressions.

These impressions are returned to our laboratory where qualified dental technicians prepare the models and fabricate individual custom laminated mouthguards.

The mouthguards are then returned, to your club or school for distribution. Galadent takes pride in being the original supplier of this service in WA.

If you would like to be fitted with one of our professional custom laminated mouthguards please complete the following 4 steps:

- STEP 1** Select a Mouthguard Type (If unsure our staff will assist)
- STEP 2** Select a Mouthguard Colour
- STEP 3** Complete Payment Details
- STEP 4** Complete Personal Details and Medical History

STEP 1

SELECT MOUTHGUARD TYPE (PLEASE TICK BOX)

TYPE

GD XPRO PRIMO

DESCRIPTION

A state of the art Dual Layered mouthguard designed for growing mouths. Provides both added comfort and protection for young mouths.

SUITABILITY

The best introduction to custom mouthguards. Recommended for young children who mainly have deciduous (baby) teeth present (usually up to age **6 years**).

GD XPRO FORTE

The most up to date Multi Layered mouthguard which incorporates a unique design for extra comfort, fit and protection.

Generally suited for juniors in that late mixed dentition stage. Having baby teeth present together with partly erupted pre-molars and permanent canines (usually from age **7 to 12**).

GD XPRO SUPERIO

A heavy duty superior Multi Layered mouthguard for that added protection.

Highly recommended for teenagers and adults who have all permanent dentition (no presence of baby teeth). **13 years and over** A must for 'Stick' sports and vigorous contact sports.

GD XPRO ULTIMO

The ultimate in laminated technology. Providing the comfort, fit and protection that only a Tri Laminar can deliver.

The mouthguard of choice for all high level and professional competition.
