The University of Notre Dame is looking for adolescents and their parents to complete a couple of questionnaires about identity development and motor co-ordination.

Adolescence is a crucial time for identity development as often they are questioning their place in the world and making sense of their surroundings. During this time, being able to participate in weekend sporting competitions and other informal physical activities are also very important for social interactions, peer relationships, which can influence how adolescents form who they are. We want to examine how motor competence impacts identity formation in adolescence.

Interested to participate? Click on the links below:

Parents will be asked complete questions about:
Their child's motor competence and impulsivity and hyperactivity
Parents use this link: https://qtrial2015az1.az1.qualtrics.com/SE/?SID=SV_a4aNKVHfYxCM6kB
(Parents, please complete your link first as a unique code will be generated to ensure you have given consent for your child to participate. These should take about 15 minutes).

Adolescents in year 9, 10 & 11 will be asked to complete questions about:
Their self-perceptions, identity formation and motor competence
Adolescent link: https://qtrial2015az1.az1.qualtrics.com/SE/?SID=SV_3mcNhqpGC0TxC3b
(These should take about 35-40 minutes).

As a thank you for participating, your name will go into a draw to win an iTunes Voucher.
You can also chose to participate in Phase 2; Focus Group discussion with adolescents or an interview for parents.
